Thank You! for Being a Loyal Member!

Now more than ever, we are committed to delivering quality, affordable health care to all Angelenos. It is now time to renew your health insurance for coverage that begins on January 1, 2019.

Why renew your L.A. Care Covered™ Health Plan?

• You can count on a health plan that was created to serve you - L.A. Care is a not-for-profit health plan dedicated to meeting the health care needs of all Angelenos.

• You have access to our large network of providers - Our network includes 60 hospitals, 3,000 physicians and 1,000 pharmacies, including CVS and Rite Aid stores.

• You get no-cost preventive and wellness care - You may have no co-pays or co-insurance, and you do not have to meet your deductible (if there is one for your plan), before full coverage for preventive care services begin.

• You can take advantage of all the programs and services we offer - Our free Nurse Advice Line is available to all members, 24 hours a day, 7 days a week. Our Family Resource Centers offer free health education, exercise classes and disease management programs.

How to renew?

• If you are happy with your current health plan, then YOU DON’T NEED TO DO ANYTHING. Covered California™ will renew your insurance using the most recent household size and income information in your application.

• To make changes to your current plan, call our Enrollment Support Services team at 1.855.222.4239 (TTY 711) for personalized assistance. Or visit us at lacarecovered.org to shop and compare plans that best suit you and your family.

Please note that December 15, 2018 is the last day to renew or change your plan for coverage beginning on January 1, 2019.
Mammograms Save Lives

Women ages 50 to 74 should get a mammogram every two years.

October is Breast Cancer Awareness Month and L.A. Care Covered™ encourages you to take care of your health.

A mammogram is an X-ray that tests for breast cancer. Even if you’re healthy, don’t feel lumps, or don’t have a family history, you still need to be tested for breast cancer. If you’re between 50 and 74 years old, get a mammogram every two years.

Mammograms are safe. You cannot get cancer from a mammogram. It can be a little uncomfortable, but the test only takes a few minutes. An over-the-counter pain reliever may help ease any discomfort.

Mammograms are free for L.A. Care Covered™ members. Call your doctor to schedule your appointment today. Your doctor’s office can refer you to a mammography center near you. L.A. Care may be able to assist with transportation if you need help getting to and from your appointment.

Care for Your Mind

Taking care of your mental health is important. It includes our emotional, psychological, and social well-being. It affects how we think, feel, and act. It also helps determine how we handle stress, relate to others, and make choices. Good mental health is important at every stage of life, from childhood and adolescence through adulthood.

When you have good mental health, you can realize your full potential. You can maintain it by getting professional help when needed. It is important to connect with others, stay positive, be physically active, get enough sleep and develop coping skills.

Coverage for mental or behavioral health care and substance use treatment is included in the benefits for L.A. Care Covered™ members. If you or a loved one is in need of these services, please visit your primary care provider (PCP) or contact Beacon Health Options at 1.877.344.2858 (TTY 1.800.735.2929), 24 hours a day, 7 days a week, including holidays. In case of an emergency, please call 911.

Grow Your Attitude of Gratitude

Thanksgiving usually means spending quality time with family and friends and enjoying lots of delicious food. It is also a time to reflect and be thankful. Gratitude is important, not just on Thanksgiving, but each and every day. Take time to notice the positive things in your life. Practicing gratitude is a great way to promote good physical and mental health.

Being grateful enables you to better deal with stress and trauma. It can make you more helpful to others. Gratitude boosts the feeling of connection and lessens comparing yourself to others.

You can take simple steps to practice gratitude. One way is to count your blessings. Daily or weekly, think of or write down a few things you are grateful for. Perhaps you appreciate a sunny day, a good meal or a friendly co-worker.

Once you start noticing things to be grateful for, pause to enjoy them. Stop and savor the feeling of the sun on your skin or the taste of food, or the way your co-worker makes you laugh.

Do something to show your gratitude. Thank people who do something nice for you. Tell people in your life what they mean to you. Take the time to do something nice for another person. Then they will have reason to be grateful, too.

It’s Time to Get the Flu Shot

Getting a flu shot is easy and free for L.A. Care Covered™ members. Just go to your doctor or pharmacy and show your L.A. Care member ID card. It’s best to get your flu shot early in the season to give your body time to respond to the vaccine.

Questions? Call 1.800.249.3619 (TTY 711) to speak to a registered nurse. The Nurse Advice Line is available 24 hours a day, 7 days a week.

Tasty, Delicious Holiday Punch!

Fall celebrations like Halloween and Harvest Day are a perfect time to try this delicious kid-friendly punch!

**Ingredients**

- 4 Cups Apple Cider
- 1 Cup Pear Nectar or White Grape Juice
- 3 Cups Ginger Ale
- 1 Diced Apple

**Instructions**

Combine apple cider, pear nectar, and ginger ale into a pitcher or punch bowl. Throw in the apples and enjoy!
A Little Information Goes a Long Way

L.A. Care members have individual needs. Periodically, we ask questions that let us know exactly what those needs are. You may be asked, for example, “What is your race?” or “What is your preferred written or spoken language?” The information you provide will help us better understand the needs of the members we serve, initiate programs to improve quality of care, and provide patient-centered care.

By state law, L.A. Care must collect information about your race, ethnicity, and language preference. We may also ask about your sexual orientation or if you have any disabilities. Providing L.A. Care with this information is optional, but it can help you receive better care. For example, it can help you get access to L.A. Care’s language help services—such as receiving written materials in your preferred language or format. It can also give you access to our no-cost interpreting services, available 24 hours a day, 7 days a week, including American Sign Language.

Your health is very important to us, and so is your privacy. The information you give to L.A. Care is safe. L.A. Care protects the privacy of your information and is only allowed to use or disclose it for limited purposes to authorized users. Moreover, the information you provide can never be used to deny you coverage and/or benefits. L.A. Care does not use individual member demographic data to perform underwriting, set rates or determine benefits. Your race, ethnicity and language preferences help us provide you with care tailored to your individual needs.

Please call Member Services at 1.855.270.2327 (TTY 711) to update your information or for any questions regarding the use of your personal information.

Protect Your Identity

You could become a victim of medical identity theft if someone gets your medical ID or Social Security number. Once they have it, they can use it to see the doctor, buy prescription drugs, or submit fake bills in your name. Medical identity theft can also damage your credit rating and harm your health. If false information gets into your medical records, you may get the wrong treatment. Here are some ways to protect yourself against medical identity theft:

✓ Do not trust strangers who offer free or discounted medical services.
✓ File paperwork and shred what you do not need.
✓ Keep your insurance and Social Security numbers safe.
✓ Never share your information with persons who say they are bill collectors. If they really are bill collectors, they will already have your information.
✓ Review your medical bills and statements, and your Explanations of Benefits. Check for items or services you did not receive. If you see something strange or wrong, call your health care provider.

If you have questions about your bill and/or Explanation of Benefits or think there is a mistake, please call Member Services at 1.855.270.2327 (TTY 711).
Do You Need to See a Doctor?

Getting in to see your doctor can be easy! L.A. Care has implemented rules about how long you should wait to get a doctor appointment. You should be able to get an appointment within these timeframes:

<table>
<thead>
<tr>
<th></th>
<th>Routine Appointment (non-urgent)</th>
<th>Urgent Appointment (no authorization required)</th>
<th>Routine Appointment (non-urgent)</th>
<th>Urgent Appointment (requires prior authorization)</th>
</tr>
</thead>
<tbody>

<td></td>
</tr>
</tbody>
</table>

Did you know that you can get health advice when your doctor’s office is closed, on weekends and on holidays?

- L.A. Care doctors must be available, or have someone available, to help you at all times.
- If you need to talk to your doctor when the office is closed, call your doctor’s office phone number. Follow their instructions.
- A doctor or nurse should call you back within 30 minutes.

If you have trouble reaching your doctor, call L.A. Care’s Nurse Advice Line at 1.800.249.3619 (TTY 711) 24 hours per day, 7 days per week. A nurse will give you the health information you need. Remember, if you have a medical emergency and need help right away, dial 911 or go to your nearest emergency room.

Remember to get your Zzzzs

Getting enough sleep helps keep your mind and body healthy. Make sure your bedroom is quiet, dark and at a comfortable temperature. Turn off technology 20-30 minutes before sleep, consume less alcohol and do not smoke tobacco at night. These changes may not guarantee you extra hours of sleep, but they will help make the most of every minute you are in bed. Even if your lifestyle may not allow big changes right now, at the end of the day, if you make sleep a priority, you are also prioritizing your health!
Naloxone, the Antidote for Opioid Overdose

Opioids are prescription drugs for strong pain. The most common prescription opioids are hydrocodone, oxycodone, morphine, oxymorphone, codeine and fentanyl. Some opioids are street drugs (they don’t come from a pharmacy) and are harmful to your health. Taking too much of any opioid can cause a person to stop breathing and even die. This is called an overdose.

**Signs of an opioid overdose include:**
- Limp body - no response, even if you call their name or shake them
- Slowed or stopped breathing
- Blue or gray color to lips and fingernails
- Pale or clammy skin

**Naloxone can reverse an opioid overdose and cause someone to breathe again.**
- In order to work, naloxone must be used right away with first signs of an overdose.

**If you think that someone has overdosed on opioids:**
- Look for the signs of overdose
- Give naloxone
- Call 911
- Give a second dose in 2-3 minutes if there is no response
- Follow 911 dispatcher’s instructions

**To avoid accidental overdose:**
- Get your pain medications from the same doctor
- Do not take more than the dose of an opioid prescribed by your doctor
- Do not mix opioids with alcohol, benzos (alprazolam, diazepam, clonazepam), muscle relaxants, or medicines that make you sleepy
- Do not take prescription drugs from family and friends
- Do not use street drugs

**If your doctor writes a prescription for an opioid drug, play it safe and ask for a prescription for naloxone. You can even ask your pharmacist for naloxone if you don’t have a prescription from your doctor.**

To find out more about the L.A. Care list of covered drugs called the Formulary, and monthly updates, visit the L.A. Care website at [lacare.org](http://lacare.org). You will also find information about limits or quotas, generic and brand medications, restrictions on medication coverage, the medication request process, drug preferences and procedures on how to use the Formulary.
