Video Remote Interpreting for American Sign Language Now Available!

Did you know that L.A. Care now offers video remote interpreting (VRI) for members who use American Sign Language (ASL)? This brand new tool is available for deaf and hard of hearing members at L.A. Care’s Visitor Center.

Have questions about your plan? You can now talk to us in person to get them answered. VRI staff will help guarantee that an interpreter is available as needed for good communication.

Get video remote interpreting in three easy steps:

1. Stop by the L.A. Care Visitor Center. It is in the lobby reception area.
2. Present your “I Speak ASL” card or let us know that you use ASL.
3. Get connected. An L.A. Care representative will answer your questions with the help of an interpreter connected through video. It’s that simple.

The L.A. Care Visitor Center is located at 1055 W. 7th St., Los Angeles, CA 90017. It is open Monday through Friday, 8 a.m. - 5 p.m.
Ask the Doc: Get Your Child Tested for Strep Throat

Q: When are kids most likely to get sick?
A: Kids are more likely to get sick in the fall and winter. Sore throats this time of year are very common and can spread quickly from child to child.

Q: What causes sore throats?
A: Most sore throats are caused by a virus and go away on their own in one to two days. But if your child has a very bad sore throat with fever, it’s time to see the doctor. Your child may have strep throat.

Q: What causes strep throat and how is it treated?
A: Strep throat is caused by bacteria and needs treatment with antibiotics. Your child’s doctor will do a quick strep throat test in the office. If the test shows your child has strep throat, the doctor will most likely prescribe antibiotics. It will help to kill bacteria and should only be used if your child’s sore throat is caused by bacteria. Antibiotics cannot kill viruses and will not help your child feel better if they do not have strep throat.

Your child’s doctor is your partner in health. He or she will work with you to help your child feel better as quickly as possible.

Getting a Mammogram Is Easy
Your Loved Ones Will Thank You!

October is Breast Cancer Awareness Month. If you are a woman between the ages of 50 and 74, you should get a mammogram every two years.

A mammogram is an X-ray that screens for breast cancer and is free for L.A. Care members. It is the best way to find cancer and help save your life. You do not need an authorization or referral. Your doctor’s office can refer you to a mammography center in your area. L.A. Care may be able to assist with transportation if you need help getting to and from your appointment. L.A. Care also has free interpreting services to help you speak to your doctor in your language, if you need assistance.

Taking care of yourself is a great way to show your family how much you care about them. Call your doctor to schedule your mammogram appointment today.
Nurse Advice Line Audio Health Library

The Nurse Advice Line offers an audio health library with recorded messages on many different health topics. Call the Nurse Advice Line 24 hours a day, 7 days a week, and follow the directions to reach the audio health library. The recorded health topics can last 1 to 7 minutes. If you need help hearing a recording, please stay on the line and a nurse will help you.

You can also speak to a registered nurse for answers to your health questions. The nurse can help you understand the best choice for medical care. The Nurse Advice Line can be reached by phone at 1.800.249.3619 (TTY 711) or chat with a nurse online. Please visit lacare.org and log onto the member sign-in to access the nurse chat function.

If you are a Medi-Cal member with one of our Plan Partners, you can call the Nurse Advice Line at:

**Anthem Blue Cross**
1.800.224.0336 or TTY 1.800.368.4424

**Care1st Health Plan**
1.800.609.4166 or TTY 1.800.735.2929

**Kaiser Permanente**
1.888.576.6225

Colorectal Cancer Screening Saves Lives

Colorectal cancer, also referred to as colon cancer, is the second leading cause of cancer death that affects both men and women combined. But, it’s also one of the most preventable.

Screening tests can help prevent colorectal cancer and look for problems early, when they are easier to treat. L.A. Care and your doctor want to help you stay healthy and ask that you get screened regularly.

- If you are 50 or older, you need to get screened.
- Don’t wait, take action today for a healthy life.
- Screening tests are at no cost to you.

Colorectal cancer screening saves lives. It can help prevent colorectal cancer and look for problems early, when they are easier to treat. L.A. Care and your doctor want to help you stay healthy and encourage you to get screened regularly.

**When to get screened**
You should start getting screened at age 21. Keep track of your tests and when your next test is due.

- **Women ages 21 to 65 need a Pap test every three years**
- **Women ages 30 to 65 can get tested every five years if they get both Pap and HPV tests**

Ask your doctor if you need to continue with screening if you are over age 65.

Pap and Human Papilloma Virus (HPV) tests can help prevent cervical cancer and detect problems early, when they are easier to treat. L.A. Care and your doctor want to help you stay healthy and encourage you to get screened regularly.

Make Time for Pap Tests
Take Care of Your Mental Health Needs

Having a healthy mind and body is important to your overall health and wellbeing. Sometimes people need to take medication to help keep their mind healthy. If your doctor prescribes medication for you, always follow the instructions. Be sure to pick up your refills on time and don’t run out.

- **Antipsychotic medication**: This medicine is used to treat conditions such as schizophrenia, bipolar disorder, etc. If you take antipsychotic medication, it is important to get a blood test every year. The test will check your blood sugar and cholesterol levels which can sometimes go up with antipsychotic drugs. Talk to your doctor to find out if it is time for your yearly blood test. Ask your doctor to write you a prescription for a 90-day supply of medicine.

- **Antidepressant medication**: This medicine is used to treat conditions such as depression, anxiety, etc. It can take up to four weeks for you to feel that your antidepressant medication is working. Do not stop or skip a dose, even when you start to feel better. Ask your doctor to write you a prescription for a 90-day supply of medicine.

- **Attention Deficit Hyperactivity Disorder (ADHD)**: ADHD is a condition where you may daydream and have trouble paying attention, find it difficult to sit still for even a short time and often take action before you think about what you are doing. ADHD is generally diagnosed in children between the ages of 6-12. If your child takes medication for ADHD, it is important that they see their doctor within 30 days after they start it. Your child will also need to see a doctor or therapist at least two more times within the first nine months.

As an L.A. Care member, you have access to mental health care. For more information, please contact L.A. Care Behavioral Health at 1.877.344-2858 (TTY 1.800.735.2929).

The L.A. Care Drug Formulary

L.A. Care has a list of covered medicines, called the Formulary or Drug List. Medicines on the Formulary are in alphabetical order. They are also listed by the health condition they are used for. Both brand name and generic medicines are covered. Your doctor may prescribe a medicine that is not on the Formulary. This means that the medicine will need to be approved by L.A. Care. You can see the list of covered medicines on the L.A. Care website, lacare.org. Click on the For Members tab and under Member Services, select Pharmacy Services.
Let’s Choose Health Together!

The L.A. Care Family Resource Centers (FRCs) are Your Centers for Health and Wellness! Our FRCs are vibrant spaces for the community to come together and learn new skills. The Centers offer health education and exercise classes that are free and open to everyone. You and your family can take CPR, Dance, Healthy Cooking, Zumba®, Yoga classes and much more at your nearest center. L.A. Care members can attend a member orientation, request a member ID card, and get help choosing a doctor or making an appointment.

There are four FRCs conveniently located throughout Los Angeles County:

• Boyle Heights (The Wellness Center at the Old General Hospital)
• Inglewood (Corner of Century & Crenshaw)
• Lynwood (Plaza Mexico)
• Pacoima (Corner of San Fernando Rd. & Van Nuys)

Visit an L.A. Care Family Resource Center today. For more information or to view our calendar of activities, visit lacare.org/frc or call 1.877.287.6290.

Lead – A Hidden Danger

Lead cannot be seen and has no smell, yet it can make you sick. It can affect your children’s ability to learn. Lead is in our air, food, water, dust, and soil. Lead-based paint is the most common and harmful source of lead.

Young children are at higher risk of lead poisoning because their bodies absorb and hold on to more lead than adults’ bodies. Risk factors include:

• Age: under 6 years
• Being a recent immigrant or foreign adoptee
• Having parents who are exposed to lead at work
• Living in an older pre-1978 poorly maintained housing/building
• Low income

Talk to your doctor if you think your child has been exposed to lead. Most kids have no symptoms. A blood test is the only way to know for sure. All children should have at least one blood test for lead screening by their second birthday. Your doctor can help you find ways to lower lead exposure. He or she can also tell you about treatment options if needed.

Know How to Protect Yourself Against Medical Identity Theft

Medical identity theft can happen if someone gets your medical ID or Social Security number. They can use it to see the doctor, buy prescription drugs, or submit fake bills in your name. Not only can medical identity theft damage your credit rating, it can also harm your health. If false information gets into your medical records, you may get the wrong treatment.

Following are some ways to protect yourself against medical identity theft:

• Distrust strangers who offer free or discounted medical services.
• File paperwork and shred what you do not need.
• Keep your insurance and Social Security numbers safe.
• Never share your information with persons who say they are bill collectors. If they really are, they will already have your information.
• Review your medical bills and statements. Check for items or services you did not receive. If you see something strange or wrong, call your health care provider.

If you have questions about your bill or think there is a problem, please call L.A. Care Member Services at 1.888.839.9909 (TTY 711).

Find Your Reason to Quit Smoking for Good

The Great American Smokeout is on November 17. On this day, L.A. Care and the American Cancer Society encourage you to find your reason to quit smoking for good. Anyone can do it. Start preparing now. Success starts with finding a reason that’s important to you. Great reasons to quit smoking are:

- To feel better, have more energy and breathe easier
- To reduce the chance of getting sick
- To have whiter teeth and a healthier mouth
- To taste and smell food better
- To improve the health of people around you
- To give your baby the best start if you’re pregnant
- To save up to $1,900 a year! (based on smoking a pack a day at the cost of $5 per pack)

The California Smoker’s Helpline is a free phone-based counseling service that can help you quit smoking. Call 1.800.NO.BUTTS (1.800.662.8887) to learn more. Your health plan also covers medication if you feel you need help to quit. Call your doctor for a prescription.

You will be taking an important step towards a healthier life. Today’s the day that quitters win!

Steps to Fight the Flu

Flu season is here! Get a FREE flu shot to prevent getting sick. It’s simple. Go to your doctor and show your L.A. Care member ID card. Questions? Call 1.888.839.9909 (TTY 711).

- Get your flu shot!
- Wash your hands
- Avoid touching your face
- Cough/sneeze into your sleeve
- Exercise
- Eat healthy
- Get plenty of sleep
- Avoid contact with sick people

Doctor + Flu Shot = Protection for yourself and your family
Wait Times for Appointments

Did you know L.A. Care must meet the California Department of Managed Health Care (DMHC) Timely Access Law and has rules about how long you should wait to get a doctor appointment? Appointments must be offered within the timeframes listed below.

Primary Care Doctors

- Routine appointment (non-urgent): 10 business days
- Urgent appointment (no authorization required): 48 hours
- Urgent appointment (requiring prior authorization): 96 hours

Specialists

- Routine appointment (non-urgent): 15 business days
- Urgent appointment (no authorization required): 48 hours
- Urgent appointment (requiring prior authorization): 96 hours

Exceptions

- The purpose of the Timely Access Law is to make sure you get the care you need. Sometimes you need appointments even sooner than the law requires. In this case, your doctor can request that the appointment be sooner.
- Sometimes waiting longer for care is not a problem. Your provider may give you a longer wait time if it would not be harmful to your health. It must be noted in your record that a longer wait time will not be harmful to your health.
- If you can’t get a timely appointment in your area because there are not enough providers, your health plan must help you get an appointment with an appropriate provider.

Some health care service plans may be exempt from these standards. For more information, please call the DMHC Help Center at 1.888.466.2219.

What if I need health advice when my doctor’s office is closed?

You can get health advice when your doctor’s office is closed and on weekends or holidays.

- L.A. Care doctors must be available, or have someone available, to help you at all times.
- If you need to talk to your doctor when the office is closed, call your doctor’s office phone number. A doctor or nurse should call you back within 30 minutes. Follow their instructions.

If you have trouble reaching your doctor, call L.A. Care’s Nurse Advice Line at 1.800.249.3619 (TTY 711) 24 hours per day/7 days per week. A nurse is available to discuss your health care. However, if you have a medical emergency and need help right away, dial 911 or go to your nearest Emergency Room.
