RE: Updates and Improvements to the L.A. Care Online Provider Directory

Dear Valued Provider,

L.A. Care Health Plan (L.A. Care) maintains a commitment to providing accurate and reliable resources to support its contracted provider network. Updates are now available on the ongoing efforts to enhance the L.A. Care Online Provider Directory (OPLD) and address key issues identified during the review process.

Directory Accuracy Improvements

L.A. Care has implemented a robust quality assurance process to ensure directory accuracy. This includes enhanced verification procedures and regular audits of provider data. System discrepancies have been addressed, including language coding corrections, to provide more accurate provider information.

Facility Updates

L.A. Care announces that all UCLA locations and specialties have been fully integrated into the directory. Additionally, updates to Children's Hospital Los Angeles (CHLA) clinic locations have also been completed, ensuring that all specialties available at specific CHLA locations are accurately reflected in the directory.

Pediatric Age Restrictions Added

To better serve the pediatric population, L.A. Care has enhanced the directory to include provider age restrictions. This update will help streamline the utilization management process and make it easier to identify physicians who accept pediatric members.

Community Supports

We have recently completed comprehensive updates to our Community Supports provider listings, ensuring that members can easily access these important services through our directory.

Using the Directory Effectively

To maximize the directory's functionality:

1. Visit our online directory here: http://lacare.org/find-doctor-or-hospital

2. Use specific search filters to narrow results by specialty, location, and language.
